

Bradley Matera

Junior Data Engineer

Davis, Illinois (open to relocation) | (360) 970-0581 | bradmatera@gmail.com | www.linkedin.com/in/bradmatera | <https://bradleymatera.dev/recruiter/>

EDUCATION

- Bachelor of Science in Web Development (B.S.), Full Sail University, Winter Park, FL - October 2025
- Cumulative GPA: 3.64
- Relevant Coursework: Interfaces and Usability, Database Systems, Server-Side Languages, Advanced Server-Side Languages, Programming for Web Applications, Deployment of Web Applications, Cloud Application Development, Web Application Integration, Application Integration and Security, Interface Programming, Application Development, Discrete Mathematics
- Activities and societies: Tech Talk Club - Weekly Agile-style standups with classmates to track progress, solve issues, and support each other's projects.
- Fallen Knight: Requiem of Honor - Game jam project for KAJAM, Dec 2023. Built with classmates and ranked #9 in Artstyle. <https://itch.io/jam/kajam/rate/3114394>

SUMMARY

Junior data engineer with hands-on experience building cloud-based data workflows and infrastructure cost models. My AWS internship provided practical experience with data engineering concepts using AWS services like Lambda, DynamoDB, and S3. I am interested in data extraction, storage, processing, and analysis workflows in cloud environments, with a focus on building reliable and scalable data solutions.

SKILLS

- Data Engineering: AWS Lambda, DynamoDB, S3, serverless architectures, metadata extraction
- Data Analysis: Infrastructure cost modeling, measurable usage metrics, data processing
- Programming: JavaScript, TypeScript, Node.js, SQL fundamentals
- Cloud: AWS Certified Solutions Architect, cloud troubleshooting, networking concepts
- Tools: GitHub, VS Code, Docker, API integration, documentation

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (SAA-C03), issued July 2025, expires July 2028
- AWS Certified AI Practitioner (AIF-C01), issued August 2025, expires August 2028
- freeCodeCamp JavaScript Algorithms and Data Structures; Responsive Web Design

EXPERIENCE

Cloud Support Engineer Intern - AWS Internship, Seattle, WA

May 2025 - Aug 2025

- Built a serverless metadata extraction workflow using AWS Lambda, DynamoDB, S3, and Amplify, gaining hands-on experience with data engineering concepts like data extraction, storage, and processing in cloud environments.
- Created a transparent infrastructure cost-analysis model using measurable cloud usage metrics, demonstrating data analysis and modeling skills.
- Completed guided troubleshooting labs and technical support exercises involving distributed cloud systems.
- Worked with cloud architecture, AI/ML services, networking concepts, and operational workflows.

Junior Frontend Developer / Freelance Contributor - CIRIS Ethical AI, Remote

Oct 2024 - Jun 2025

- Improved onboarding and setup documentation for new contributors, including environment notes and JWT guidance.
- Added logging around token verification for better debugging and contributed small code updates through merged PRs.
- Created Docker Compose configuration for local development and documented larger ideas as GitHub Issues.
- Worked with AI-assisted coding workflows, debugging, deployment troubleshooting, and API integrations.

SELECTED PROJECTS

- AWS Serverless Metadata Workflow - Live walkthrough: <https://bradleymatera.dev/aws-metadata-workflow/> | GitHub: <https://github.com/BradleyMatera/Office> - Built an AWS internship capstone in an isolated training environment using S3, Lambda, DynamoDB, and an accessible frontend; later reconstructed it publicly with AWS SAM, idempotent writes, failure handling, tests, CI, diagrams, and a usage-based cost model.
- ProjectHub (Scout) - Live: <https://bradleymatera.github.io/ProjectHub/> | GitHub: <https://github.com/BradleyMatera/ProjectHub> - Built an embeddable JavaScript recruiter assistant with a Node.js/Express backend, a GitHub-synced knowledge base, grounded-first answers, multi-provider LLM failover, validation, caching, and analytics.
- Car-Match - Live: <https://bradleymatera.github.io/car-match/> | GitHub: <https://github.com/BradleyMatera/car-match> - Built a React and Express community MVP with profiles, events, messaging, and forums; deployed the frontend to GitHub Pages and the containerized backend to Google Cloud Run with optional MongoDB persistence.
- Interactive Pokedex - Live: <https://bradleymatera.github.io/Interactive-Pokedex/> | GitHub: <https://github.com/BradleyMatera/Interactive-Pokedex> - Built a Next.js 16 static export that prerenders 151 Pokemon detail pages from PokeAPI data and adds client-side search and filtering with React context, Tailwind CSS v4, and GitHub Actions deployment.

ADDITIONAL EXPERIENCE

Medic - US Army, Ft. Bragg

June 2011 - April 2014

- U.S. Army combat veteran with experience operating under pressure in high-stress environments.
- Developed strong problem-solving skills and attention to detail in critical situations.
