

Bradley Matera

Full-Stack Software Engineer | Cloud Support | AI Automation

Davis, Illinois (open to relocation) | (360) 970-0581 | bradmatera@gmail.com | www.linkedin.com/in/bradmatera | <https://bradlevmateradev.recruiter/>

SUMMARY

Full-stack software engineer with a Bachelor of Science in Web Development, AWS cloud certifications, an AWS Support Engineering internship, open-source contributor experience, and hands-on projects spanning web applications, cloud services, AI-assisted workflows, technical support, automation, and operational tooling. I work carefully in existing systems, document what I change, and keep technical claims grounded in work I can demonstrate.

CORE SKILLS

- JavaScript, TypeScript, React, Next.js, Node.js, Express, HTML, CSS, SQL fundamentals
- REST APIs, JSON, authentication concepts, JWT debugging, API integrations, responsive interfaces
- AWS Lambda, DynamoDB, S3, CloudFront, Amplify, cloud architecture, networking concepts, cost analysis
- Git, GitHub, GitHub Issues, GitHub Pages, Docker, Docker Compose, VS Code, deployment troubleshooting
- AI-assisted development, prompt design, grounded retrieval workflows, multi-provider LLM routing, evaluation and validation
- Technical troubleshooting, documentation, issue tracking, user support, operational follow-through, learning existing systems

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (SAA-C03), issued July 2025, expires July 2028
- AWS Certified AI Practitioner (AIF-C01), issued August 2025, expires August 2028
- freeCodeCamp Responsive Web Design, December 2024
- freeCodeCamp JavaScript Algorithms and Data Structures, December 2024
- freeCodeCamp Front End Development Libraries, January 2025
- freeCodeCamp Data Visualization, January 2025
- Microsoft Foundational C# with freeCodeCamp, January 2025

PROFESSIONAL EXPERIENCE

Maintenance Technician - Rock-Walworth Comprehensive Family Services, Beloit, WI

Dec 2025 - Feb 2026

- Supported day-to-day maintenance and facilities needs for Head Start and Early Head Start operations.
- Worked with staff through organizational systems, email, and Microsoft Teams while completing assigned operational tasks.
- Completed required onboarding, safety, background, physical, drug-screening, TB, and bloodborne-pathogens requirements.

Cloud Support Engineer Intern - Amazon Web Services (AWS), Seattle, WA

May 2025 - Aug 2025

- Completed a 12-week AWS Support Engineering internship focused on cloud troubleshooting, networking concepts, infrastructure analysis, customer experience, and operational workflows.
- Completed guided support rotations and technical troubleshooting exercises in isolated training environments with no production customer data.
- Completed guided Juniper and Junos networking labs delivered through Jupyter Notebooks.
- Built a serverless metadata extraction workflow using AWS Lambda, DynamoDB, S3, CloudFront, and an accessible static frontend.
- Created a transparent cloud cost-analysis model using measurable inputs such as request counts, storage, compute time, read and write usage, and data transfer.

Junior Frontend Developer / Freelance Contributor - CIRIS Ethical AI, Remote

Oct 2024 - Jun 2025

- Ran the project locally and improved onboarding and setup documentation, including environment notes and JWT guidance.
- Contributed small code updates through merged pull requests, including token-verification logging, lint fixes, and clearer error messages.
- Created Docker Compose configuration for local development and documented larger improvements through GitHub Issues.
- Worked with AI-assisted coding workflows, debugging, deployment troubleshooting, API integrations, and existing codebases.

Case Manager - Mason County, WA

Sep 2022 - Jan 2023

- Worked directly with clients participating in Veterans Court, Drug Court, and Mental Health Court programs.
- Helped clients understand requirements, tracked progress, maintained accurate documentation, and coordinated follow-through across court-related processes.
- Used crisis intervention, clear communication, organization, and calm decision-making in difficult situations.

Animal Care Associate - Mason County Kitten Rescue, Mason County, WA

Jun 2020 - Sep 2022

- Supported daily feeding, cleaning, basic healthcare tasks, behavior monitoring, intake, fostering, and adoption activities.
- Helped train volunteers and worked with a small team to maintain organized, safe care routines.

Roof Loader - Stoneway Roofing Supply

Jan 2018 - Jan 2020

- Loaded and delivered roofing materials to job sites while following safety procedures and coordinating with crews under tight schedules.
- Worked outdoors in changing conditions and developed strong habits around reliability, communication, and physical safety.

General Contracting / Construction - Ascend Roofing Company LLC

2017 - Aug 2018

- Supported residential and commercial roofing work including demolition, tear-off, material handling, installation support, cleanup, and site preparation.
- Worked directly with crews and homeowners while following instructions, maintaining job-site safety, and adapting to changing conditions.

Healthcare Specialist / Combat Medic - U.S. Army, Fort Bragg, NC and Afghanistan

Jun 2011 - Apr 2014

- Provided medical support in training environments and combat operations, including triage, trauma response, medication administration, medical readiness, and supply accountability.
- Built discipline, attention to detail, adaptability, teamwork, and the ability to make careful decisions under pressure.

SELECTED TECHNICAL PROJECTS

The canonical master keeps a broad verified inventory. Role-specific resumes use only the projects mapped to that target.

- Car-Match - Live: <https://bradlevmateragithub.io/car-match/> | GitHub: <https://github.com/BradleyMatera/car-match> - Built a React and Express community MVP with profiles, events, messaging, and forums; deployed the frontend to GitHub Pages and the containerized backend to Google Cloud Run with optional MongoDB persistence.
- ProjectHub (Scout) - Live: <https://bradlevmateragithub.io/ProjectHub/> | GitHub: <https://github.com/BradleyMatera/ProjectHub> - Built an embeddable JavaScript recruiter assistant with a Node.js/Express backend, a GitHub-synced knowledge base, grounded-first answers, multi-provider LLM failover, validation, caching, and analytics.
- Interactive Pokedex - Live: <https://bradlevmateragithub.io/Interactive-Pokedex/> | GitHub: <https://github.com/BradleyMatera/Interactive-Pokedex> - Built a Next.js 16 static export that prerenders 151 Pokemon detail pages from PokeAPI data and adds client-side search and filtering with React context, Tailwind CSS v4, and GitHub Actions deployment.
- CIRIS AI Open-Source Contributions - Pull requests: <https://github.com/CIRISAI/CIRISNode/pulls?q=is%3Apr+author%3ABradleyMatera> - Submitted 10 pull requests to CIRISNode, with 7 merged, covering Python backend work including JWT and DID authentication, benchmark and Wisdom Authority API routes, deferral workflows, validation, logging, and tests.
- AnimalSounds - Live: <https://bradlevmateragithub.io/AnimalSounds/> | GitHub: <https://github.com/BradleyMatera/AnimalSounds> - Built an offline-ready Next.js 14 and Bun soundboard with bundled MP3s, a responsive NextUI/Tailwind interface, localStorage favorites and analytics, optional photo enrichment, and GitHub Pages deployment.
- Convo-AI - Live: <https://bradlevmateragithub.io/Convo-Ai/> | GitHub: <https://github.com/BradleyMatera/Convo-Ai> - Built a local-first voice assistant using FastAPI, WebSockets, faster-whisper, Ollama, Coqui TTS, SQLite, and RAG memory, with a React/Tailwind interface, CLI, tests, CI, and Docker support.
- Triangle Shader Lab - Live: <https://bradlevmateragithub.io/TriangleDemo/> | GitHub: <https://github.com/BradleyMatera/TriangleDemo> - Built a Next.js 16 WebGPU learning lab with three canonical demos, 16 interactive lessons, a WGSL editor, pipeline visualizer, geometry, lighting, and texture tools, and performance analytics.
- SecureLearn LMS - Live: <https://bradlevmateragithub.io/EthicsFrontEndDemo/> | GitHub: <https://github.com/BradleyMatera/EthicsFrontEndDemo> - Built a Next.js 15 and TypeScript LMS for secrets-management training with courses, quizzes, terminal-style labs, progress tracking, role-based dashboards, and verifiable certificates.
- CheeseMath - Live: <https://bradlevmateragithub.io/CheeseMath-Jest-Tests/> | GitHub: <https://github.com/BradleyMatera/CheeseMath-Jest-Tests> - Rebuilt a calculator suite in Next.js 16 and TypeScript with math, string, regex, and card-validation tools while preserving the original React app with Jest and Selenium tests.
- AWS Serverless Metadata Workflow - Live walkthrough: <https://bradlevmateragithub.io/aws-metadata-workflow/> | GitHub: <https://github.com/BradleyMatera/Office> - Built an AWS internship capstone in an isolated training environment using S3, Lambda, DynamoDB, and an accessible frontend; later reconstructed it publicly with AWS SAM, idempotent writes, failure handling, tests, CI, diagrams, and a usage-based cost model.

EDUCATION

Bachelor of Science in Web Development - Full Sail University, Winter Park, FL

Aug 2023 - Oct 2025

- Graduated October 2025.
- Coursework included interfaces and usability, database systems, server-side languages, application development, cloud application development, deployment, web application integration, application security, interface programming, and discrete mathematics.
- Participated in Tech Talk Club through weekly Agile-style standups focused on progress, blockers, peer support, and project accountability.
- Contributed to Fallen Knight: Requiem of Honor during the December 2023 KAJAM game jam; the team ranked #9 in Artstyle. <https://itch.io/jam/kajam/rate/3114394>

ADDITIONAL INFORMATION

- U.S. Army combat veteran.
- Based in Davis, Illinois; open to remote work, regional commuting, and relocation for stable full-time employment.
- Portfolio, recruiter information, demonstrations, and verified project links are available at <https://bradlevmateragithub.io/recruiter/>.
